

# DRAGONFORCE

FIGHT SMARTER

**DragonForce is a team collaboration app for smartphones, iPads, MDCs and computer browsers that allows teams to:**

- Track personnel on maps and floor plans
- Coordinate tactics on shared whiteboards
- Capture and distribute images
- Share documents and files
- Send text messages securely to individuals and groups
- Collect critical information in shared situation reports
- Monitor user status and availability
- Create after-action reports

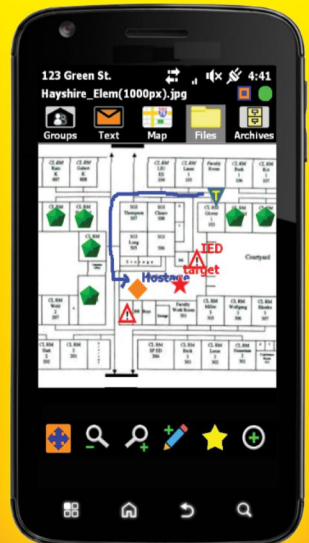

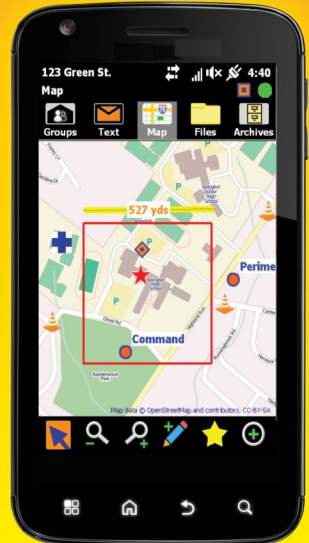

**DragonForce** empowers members of your organization in the field, in their vehicle or in the office to create and share the information they need for day-to-day or tactical operations.

**DragonForce** runs on the devices you use everyday: smartphones, MDCs, iPads and computer browsers - giving you continuous access to the information you need in both the office and in the field.

**Built for public safety, the easy-to-use design enables users to rapidly visualize and share mission-critical information, allowing them to respond more quickly, safely and effectively.**

The decisions you make and the actions you take are based on the information you and your teammates have in the moment. Give your team the best possible common operating picture and gain a tactical advantage. Arm yourself with DragonForce - Fight Smarter.

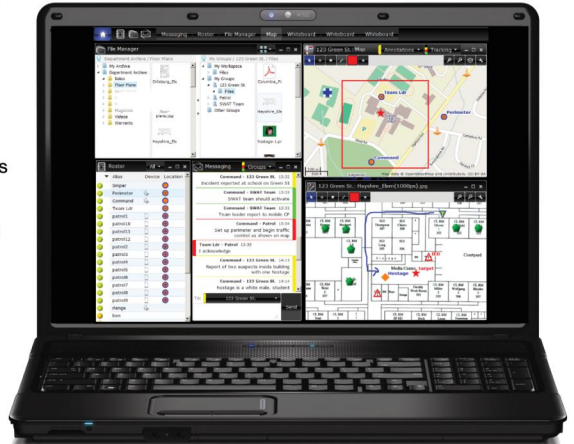

# DRAGONFORCE

FIGHT SMARTER

DragonForce gives you and your team the information you want on the devices that you use in a secure, shared environment.

**DragonForce capabilities include:**

- Shared whiteboards, allowing everyone to make annotations and place icons on maps, floor plans and pictures
- Secure text messaging to individuals and groups
- Personnel tracking in real-time using GPS or manual dead reckoning
- Shared situation reports for collecting mission critical data
- File sharing and cloud-based file storage
- After-action reporting of all messages, location reports and incident documents

DragonForce Command Center for laptops & workstation browsers

**Built for public safety, DragonForce is easy to deploy and use**

- DragonForce runs on a wide variety of devices that you already use
- The user interface is designed to facilitate quick access to mission critical data in high pressure situations
- DragonForce supports small specialized teams to large multi-department organizations, with hundreds of users (priced according to team size)
- The DragonForce server can be deployed in the cloud or hosted at your location and managed by your IT department

DragonForce Handheld for smartphones & rugged EDAs

**PS-LTE Ready**
